tion; request; a suit, entreaty. C. I imay be doubted,

with respect to prayer, whether it should be regarded as a

dissyllable or a monosyllable. By most orthospists, it is

noted as a dissyllable, but in poetry, it is commonly

used as a monosyllable; and it rhymes exactly with

care, fair, pair, &c. A similar difficulty relates to various

other words ending in er; as, for example, the dissylla
bles go'er and high'er, are pronounced exactly, or near
ly, like the monosyllables gore and hire.

Jennet de la language de la prefect; command.

Though I have agreed with all our orthodpists in making the first syllable of prefect long, I cannot follow them so implicitly in the accent and quantity of this word. All [l. e. who preceded Walker] but Mr. Sheridan, W. Johnston, and Mr. Perry, place the accent on the second syllable, and the two first of these writers make the first syllable long, as in prefect. Mr. Perry, alone, has, in my opinion, given this word its true pronunciation, by placing the accent on the first syllable, and making that syllable short. This is agreeable to that general tendency of our language to an antepenultimate accentuation, with a short quantity on every vowel but u." Walker. accentuation, but u." Walker.

"Mr. Sheridan, Dr. Kenrick, Dr. Ash, Mr. Scott, W. Johnston, and Entick, make the first syllable of this word short, as I have done, and Mr. Perry and Buchann make it long. In defence of the first pronunciation, it may be observed, that this word is not like primary and primary, the first of which is a formative of our own, and the second derived from the Latin primaries, which in our pronunciation of the Latin, does not shortown, and the second derived from the Latin, does not shorten the 1n the first syllable, as privativus does, and therefore these words are no rule for the pronunciation of this, which, besides the general tendency of the penultimate accent to shorten every vowel it falls on but u, seems to have another claim to the short vowel from its termina-

nave another claim to the snort vower from its termina-tion, thus sanative, donative, primitive, derivative, &c., all plead for the short sound." Walker. |PRIV'A\_TIVE, n. Prög'ress, v. a. To move forward; to advance. Stak.

Progress, v. a. To go round. Milton.

Progress, v. a. To move forward; to proceed; to move forward. 3;—The verb prog'ress, with the accent on the first syllable, is found in Shakspeare; and Dr. Johnson inserted it in his Dictionary, noted as "not in use." The word is also found in Milton, used in an active sense; as, "to progress a circle;" in this sense, however, it is entirely obsolete. But the neuter verb progress', with the accent on the second syllable, is of modern origin or revival; and it has generally been modern origin or revival; and it has generally been regarded as an Americanism. It often occurs, both in conversation and in published writings, though a great part of our best writers forbear the use of it. It has of late been much used in England, and by writers of high respectability. Among the numerous English authorities that may be brought forward for the use of it, are the following:—Sir Robert Peel, O'Connell, Coleridge, Dick, Hood, Bulwer, Dickens, the British Critic, the Edinburgh Review, the Guarterly Review, the Monthly Review, the Edectic Review, the Dublin Review, the Henny Cyclopedia; and it is also inserted in the late English Dictionaries of Maunder, Knowles, Smart, and Red.

PRÖ/NOON, n. [pronomen, L] A word that is used instead of a noun, to avoid the too frequent repetition of the same word.—Personal pronouns are used as substitutes for nouns that denote persons:—they are I, thou, he, she, it, with their plurals, ice, you or ye, and they.—Relative pronouns, in general, relate to some word or phrase going before, called the antecedent:—they are who, which, what, and that.—Who, which, and what, when used in asking questions are called intergative, requires. questions, are called interrogative pronouns. — Adjective pronouns partake of the properties both of pronouns and pronouns partake of the properties both of pronouns and adjectives, and are subdivided into the possessive, the distributive, the demonstrative, and the indefinite. The possessive are my or mine, thy or thine, his, her, our, your, their — the distributive, each, every, either, neither — the demonstrative, this, that, these, those: — the indefinite, some, other, any, one, all, such, &c.

Ja.; pro-nun-she, L.] Act of pronouncing; mode of pronouncing, utterance; delivery of a discourse. Er. "This word is regularly pronounced pro-nun-she-a'shun, and by all speakers would probably be so sounded if it were related to any such verb as to pronunciate, in the same way as association and enunciation are related to associate and enunciation are related to associate and enunciation are related to associate and enunciation are related to associate and enunciation are related to associate and enunciation are related to associate and enunciation. In the absence of any such related verb, most speakers say pro-nun-se-a'shun, and so avoid the double occurrence of the sound of sh in the same word." Smart. Walker says, "The very same reasons that oblige us to pronounce partiality, pro-monitality specially seconds. of sh in the same word." Smart. Walker says, "The very same reasons that oblige us to pronounce partuality, proplitation, speciality, &c., as if written parsheality, proplisheashin, spesheality, &c., oblige us to pronounce promined on as if written pronunsheashin."

The majority of the authorities above given are in favor of the sound of sh; and the Rev. Dr. N. H. Wheaton says, in his "Travels in England," "I was a little mortified at having my Yankee origin detected, by my omitting to give the full sound of sh in the word promincation." [Fr., proporto, L.] Comparative relation of one thing to another; equality of ratios; tive relation of one thing to another; equality of ratios; size, always in comparison; ratio; rate, equal degree, harmonic relation; symmetry; adaptation of one to another.—(Arich. & Geom.) An equality or similarity of ratio; that is, if the ratio of 6 to 3 be the same as that of 24 to 12, then 6, 3, 24, and 12, are in proportion, which is denoted by placing the quantities thus, 6:3:2:24:12, and is read, as 6 is to 3, so is 24 to 12. This, because three of the numbers are usually given to find a fourth, is often called the Rule of Three, and divided into direct and inverse. In direct proportion, the second term, if greater or less than the first, requires the fourth to be, in like manner, greater or less than the third, as in the above example. In inverse proportion, more requires less, and less requires more. and less requires more.

BATH! R., |rith!er. S. P. J. E. F. R. W.b.; rath!er or ra! ther, W.; ra'ther, Ja. K. Sm.] ad. [Originally the comp. from Rath.] More willingly; preferably to the other; with better reason, in preference; more properly; especially.—To have rather, to desire in preference. 27° Dr. Johnson tells us that this word is the comparative of rath, a Saxon word signifying soon, and that it still retains its original signification, as we may say, 'I would sooner do a thing,' with as much propriety as 'I would rather do it.' Some very respectable speakers pronounce this word with the first syllable like that in ra-ven; and Mr. Nares has adopted this pronunciation. Dr. Ash and Bailey seem to be of the same opinion; but all the other orthopists, to be of the same opinion; but all the other orthoepists, from whom we can certainly know the quantity of the vowel, as Mr. Sheridan, Mr. Elphinstone, Mr. Scott, Dr. Kenrick, W. Johnston, Mr. Perry, Buchanan, and Entick, make it short. There is a pronunciation of this, and some few other words, which may not improperly be called diminuitive. Thus, in familiar conversation, when we wish to express very little, we sometimes lengthen the vowel, and pronounce the word as if written lettle. In the same manner, when rather signifies just preferable, we lengthen the first vowel, and pronounce it long and slender, as if written rayther, and this, perhaps, may be the reason that the long, slender sound of the vowel has so much obtained; for usage seems to be clearly on the side of the other pronunciation, and analogy requires it, as this word is but the old comparative of the word rath, soon." Walker. to be of the same opinion; but all the other orthospists,

37 "Dr. Johnson, Dr. Ash, Dr. Kenrick, Mr. Barclay, Mr. Nares, Mr. Scott, Mr. Fry, and Entick, accent this word on the second syllable; Mr. Sheridan and Bailey on the last; and Fenning, only, on the first. But, notwith-standing so many authorities are against me, I am much deceived if the analogy of pronunciation be not decided-ly in favor of that accentuation which I have given. We have but few instances in the language who re we receive a word from the Latin, by dropping a syllable, that we do not remove the accent higher than the original. Thus co not remove the accent inginer than the original. Into recondite, derived from recondute, may with as much pro-priety remove the accent from the long penultimate, as cerbinals from carbusaliss, calumny from calumnia, detri-ment from detrimentum, is no cercy from innocentia, contro-versy from controversia, and a thousand others. The word facebased must certainly follow the fortunes of the present word; and we find those orthospiets, who have the word, accent it as they do recondite, Mr. Sheridan on the last syllable, but Mr. Fenning, inconsistently, on the second."

A. - Med Since and Milton place the accent upon the second syllable of this word; and, as Mr. Nares observes, Dr. Johnson has, on the authority of these authors, adopted this accentuation. But this, says Mr. Nares, is irregular; for every monosyllabic termination, added to a word accented on the antepenult, throws the accent to the fourth syllable from the end.' With great respect for Mr. Nares' sopinion on this subject, I should think a much easier and more general rule might be laid down arr. Nares's opinion on this subject, I should think a much easier and more general rule might be laid down for all words of this kind, which is, that those words which take the Saxon terminations after them, as er, less, ness, lessness, ly, &c., preserve the accent of the radical word; therefore this and the following words ought to have the same accent as remedy, from which they are formed." [revera, Fr.] A fit of wandering thought or deep musing; a wild fancy; meditation. 3 Both the orthography and pronunciation of this word are unsettled, some good writers and speakers using one form, and some the other. — "This word seems to have been some years floated." other. - "This word seems to have been some years floatother. — I his word seems to have been some years most-ing between the accent on the first and last syllable, but to have settled at last on the former. It may still, how-ever, be reckoned among those words, which, if occasion require, admit of either. It may, perhaps, be necessary to observe, that some lexicographers have written this word reverue, instead of revery, and that, while it is thus writ-ten, we may place the accent either on the first or last syllable; but, if we place the accent on the last of revery, syllable; but, if we place the accent on the last of revery, and pronounce they like e, there arises an irregularity which forbids it; for y, with the accent on it, is never so pronounced. Dr. Johnson's orthography, therefore, with y in the last syllable, and Mr. Sherdan's accent on the first, seem to be the most correct mode of writing and pronouncing this word." Maker.

The use of the word ride, both as a verb and a noun, in the sense of being conveyed in a carriage, his been regarded as an Americanism; and it has been maintained that the English use, and the proper meaning of ride, is a conveyance on horseback; and that

ing of ride, is a conveyance on horseback; and that a ing of ride, is a conveyance on norseasch; and that a conveyance in a carriage is not a ride, but a drive, and it is thus used in the following quotation from Cowper. "Sometimes I get into a neighbor's chaise, but generally ride;" (i. e., on horseback.)—The Quarterly Review remarks upon what has been called the American use of the word, that "it has been, for a hundred years, a noted vulgarism in England." This "noted vulgarism" has vulgarism in England." This "noted vulgarism" has been countenanced, for more than "a hundred years," by the English dictionaries, and it is sanctioned by the most eminent English lexicographers. Bailey defines the wort to rude, "to go on horseback, in a coach, wagon, &c.," Johnson, "to travel on horseback; to travel in a vehicle;" Richardson, "to convey or carry on a horse, or other animal, or in any sort of carriage, to sit upon such an animal, or in such a carriage, whether the motion be slow or fast," and Todd defines the noun rule, "an excursion in a vehicle or on horseback; as, 'to take a rude." — "He made him to rule in the charuct." Afr "Dr. Johnson tells us that this word is originally and properly salf; which, having solves in the plural, the singular, in time, was borrowed from it; sealf, Saxon, undoubtedly from salvus, Latin. There is some diversity among our orthospists about the lin this word and its verb. Mr. Sheridan marks it to be pronounced, Mr. Smith, W Johnston, and Barclay, make it mute, Mr. Scott and Mr. Perry give it both ways, and Mr. Nares says it is mute in the noun, but sounded in the The mute I is certainly countenanced in this word by calve and halve; but, as they are very irregular, and are the only words where the l is silent in this situation, (for value, delve, solve, &c., have the l pronounced,) and as this word is of Latin original, the l ought certainly to be preserved in both words, for, to have the same word sound ed differently to signify different things, is a defect in language that ought, as much as possible, to be avoided."

[SCAL'LOP, (sköl'lup) [sköl'lup, S. W. P. J. F. K. Sm. Wb.; skal'lup, E. Ja.] n. A fish with a hollow, rounded shell pectinated:—a hollow, or round, at the edge of any thing. Syr. This word is irregular, for it ought to have the a in the first syllable like that in tallow; but the deep sound of a is too firmly fixed by custom to afford any expectation of a change. Mr. Sheridan, Mr. Scott, Dr. Kenrick, Mr. Nares, and Mr. Smith, pronounce the a in the manner I have given it." Walker.

ISCEP'TIC, (skep'tik) [skep'tik, S. W. P. J. F. Ja. K. Sm.;

sep'tik, E.] n. [orentricks, Gr.; seeptique, Fr.] An adherent to the sceptical philosophy, a Pyrrhonist; a doubter, one who disbelieves the truths of revelation; an infidel.

27 The old orthography of this word was sceptic; and it is so printed in the old dictionaries which preceded those of Dr. Johnson, viz., those of Blount, Phillips, Coles, Kersey, Bailey, Dyche, Ainsworth, Martin, &c.; but Dr. Johnson introduced the orthography of skeptic, and in this he has been followed by a majority of succeeding lexicographers, among whom are Ash, Kennek, Barclay, Fenning, Barlow, Brown, Entick, Scott, Sheridan, Perry, Jones, Jameson, and Richardson; but sceptia is preferred by Lemon, Walker, Enfield, Fulton and Knight, Rees, Maunder, Smart, and Reid. In the first edition of Dr. Webster's large Dictionary, (1828), the word stands sceptic, pronounced sep'tic; but, in the second edition, (1841,) it is altered to skeptic. In encyclopadias and dictionaries of the arts and sciences, the orthography generally used of the arts and sciences, the orthography generally used

is sceptic.

Walker, in speaking of the orthography and pronunciation of this word, says, "Dr. Johnson has not only given his approbation to the sound of k, but has, contrary to general practice, spelt the word skeptic. It is not my intention to cross the general current of polite and classi-cal pronunciation, which is, I know, that of sounding the c like k; my objection is only to writing it with the k; and

c like k; my objection is only to writing it with the k; and in this I think I am supported by the best authorities since the publication of Johnson's Dictionary." In a notice of Dr. Johnson's Dictionary, in the Monthly Review, in 1755, soon after its first publication, the following remark is found, in relation to this word: "Seept. he insists, ought to be written skeptic, but without producing any authority in favor of that mode of spelling." In all the instances, six in number, adduced by Johnson to illustrate the use of the words sceptics, sceptical, and scepticsm, the orthography of see, and not sk, is used, the same is the fact with respect to all the instances, nine in number, adduced by Richardson in his Dictionary. The orthography of seeptics, scepticals, continues to be

number, adduced by Richardson in his Dictionary. The orthography of sceptic, sceptical, scepticasm, continues to be the prevailing and best usage; so being pronounced hard like sk in these words, as in the word scirrhus.

SCIRRHUS

Schraus. Schm [sizm, S. W. P. F. E. Ja. K. Sm. R. Wb.] n. [schisme, Fr.;  $\alpha\chi(\sigma_{BR}, Gr.]$  A separation from the true church; a division or separation, particularly among those who profess the same religion; a division; separation. 3.7 "The common pronunciation of this word is contrary to every rule for pronouncing words from the learned languages, and ought to be altered. Ch, in English words, coming from Greek words with  $\chi_1$  ought always to be pronounced like  $k_1$  and I believe the word in question is almost the only exception throughout the ways to be pronounced like k; and I believe the word in question is almost the only exception throughout the language. However strange, therefore, skirse may sound, it is the only true and analogical pronunciation; and we might as well pronounce scheme seme, as eskiem stim, there being exactly the same reason for both. But, when once a false pronunciation is fixed, as this is, it requires some daring spirit to begin the reformation; but, when once begun, as it has (what seldom happens) truth, novelty, and the appearance of Greek crudition, on its side, there is no doubt of its success. Whatever, therefore, may be the fute of its pronunciation, it ought still to retain its spelling. This must be held sacred, or the whole language will be metamorphosed; for the very same resson that induced Dr. Johnson to spell sceptick skeptick, ought to have made him spell schism sizm, and schedule schile. All our orthospists pronounce the word as I have marked it." Walker.

RUS-FS. (Med.) An induration of a gland, forming an indolent tumor not readily suppurating, and at first unattended by discoloration of the skim.—Sometimes written schirrhus and skirrhus.

By "This word is sometimes, but improperly, written schirrus, with the h in the first syllable instead of the last. and Bailey and Fenning have given us two aspirations, and spelt it schirrhus, both of which modes of spelling the word are contrary to the general analogy of orthography, for, as the word comes from the Greek σ· ιρίρο, the latter r, only, can have the aspiration, as the first of these double letters has always the spiritus lens, and the c, in the first syllable, arising from the Greek κ, and not the χ, no more reason can be given for placing the hafter it, by spelling it schirrus, than there is for spelling scene, from σκηιή, schene; or sceptre, from σκητην, schepter. The most correct Latin orthography confirms this opinion, by spelling the word in question scirrhus; and, according to the most scritted analogy of our own language, and the spilling the word in question scirrlins; and, according to the most scilled analogy of our own language, and the constant method of pronouncing words from the Greek and Latin, the cought to be soft before the i in this word, and the first syllable should be pronounced like the word, and the first syllable should be pronounced like the first of syr-nge, Sur-ius, &c. Whatever might have been the occasion of the false orthography of this word, its false pronunciation seems fixed beyond recovery." Walker. †SCIS-CI-TÄ'TION, M. [scisataties, L.] Inquiry. Bp. Hall. Hac attaining the dignity of judge. — Sergeant-at-arms, an offi-cer attending on the person of a king; an officer of a court, or of a legislature, whose duty it is to arrest offend-

ers, &c.

This word is often written serjeant; and this orthography is found in encyclopædias, many works on law, and other publications; though the orthography in most of the English dictionaries is sergeant.

There is a remarkable exception to the common of the latture in the words clerk, sergeant, and a sound of the latture in the words clerk, sergeant, and a

sound of the letter is in the words clerk, sergeaut, and a few others, where we find the s pronounced like the a in dark and margins. But this exception, I imagine, was, till within these few years, the general rule of sounding this letter before r, followed by another consonant. This this letter before r, followed by another consonant. Thirty years ago, every one pronounced the first syllable of merchant like the monosyllable murch, and as it was originally written, marchant. Service and servant are still heard, among the lower orders of speakers, as if written sarvice and servant; and even among the better sorl, we sometimes have the salutation, 'Sir, your sarcant,' though this pronunciation of the word singly would be looked upon as a mark of the lowest vulgarity. The proper names Derby and Berkeley still retain the old sound, but even these, in polite usage, are getting into the common sound, nearly as if written Durby and Burkeley. As this modern pronunciation of the e has a tendency to simplify the language by lessening the number of exceptions, it ought certainly to be indulged." Walker. Walker.

"The letters er are irregularly sounded ar in clerk and

"The letters er are irregularly sounded ar in clerk and sergeant, and formerly, but not now, in merchant, Derby, and several other words." Smart.

In the United States, the letters er are, by good speakers, regularly sounded, as in her, in the words merchant, sercunt, Derby, Berkeley, &c. The regular pronunciation of clerk (clerk) is also a very common, if not the prevailing, mode. Many give the same sound to s in sergeant. See Clerk, and Merchant.

It implies having intention or purpose to, or being in a state to; as, "I shall go." "I shall die." In the second and third persons, it implies compulsion, command, promise, or threat; as, "you shall die." "" you shall die," "" who shall die," "" they shall die."

Shall and suil, the two signs of the future tense in the English language, are often confounded with each other,

Shall and still, the two signs of the future tense in the English language, are often confounded with each other, especially by foreigners, and by persons not well versed in the language. A sad misapplication of these auxiliaries was made by the foreigner, in England, who, having fallen into the Thames, cried out, "I sell be drowned; nobody shall help me." Shall, in the first person, simply

foretells; as, "I shall speak:" - in the second and third persons, it commands, promises, or threatens; as, "you shall speak;" "he shall be rewarded;" "they shall be punished."— Will, in the first person, promises or threatens; as, "I will do it:"—and in the second and third persons, it simply foretells; as, "you, he, or they, will do it."

persons, it simply forecess; us, "you, ne, or they, sur do it."

The following remarks are quoted from Johnson:—
"The explanation of skall, which foreigners and provincials confound with will, is not easy; and the difficulty is increased by the poets, who sometimes give to skall an emphatical sense of will; but I shall endeavor, crussed Minerva, to show the meaning of skall in the future tense.—I. I skall love, It will be so that I must love; I am resolved to love.—2. Skall I love? Will it be permitted me to love? Will you permit me to love? Will it be permitted me to love? Will you permit me to love? Will it be that thou must love. I command thee to love; It is permitted the to love, [in poetry or solemn diction.] It will be that thou must love?

4. Skalt thou love? Will it be that thou must love? Will it be permitted to thee to love?—5. He skall love, It will be that he must love? It is commanded him that he love.—6. Skalt ke love? Is it permitted him to love? [in solemn language,] Will it be that he must love?—7. The plural persons follow the signification of the singulars."

The pronunciation of this word is very irregular, ty; so much of a kingdom or state as is under one success.

27 "The pronunciation of this word is very irregular, as it is the only pure English word in the language where the final e does not produce the long diphthongal sound of a when the accent is on it; but this irregularity is so fixed as to give the regular sound a pedantic stiffness. Mr. Sheridan, Mr. Scott, and Buchanan, however, have adopted this sound, in which they have been followed by Mr. Smith, but Mr. Elphinston, Dr. Lowth, Dr. Konrick, Mr. Perry, and Barclay, are for the irregular first. It may likewise be observed that this word, when unacconted at the end of words, as, Notinghamshire, Wiltshire, &c., is always pronounced with the like ee." Walker.

This word, in the sense of left, is accented by the poets Milton, Dryden, &c., on the second syllable, though most lexicographers and orthoepists accent it on the first syllable, whether it is used in the sense of left or percerse. — Walker says, "This word, though uniformly accented on the second syllable in the poets quoted by Johnson, is as uniformly accented on the first by all our lexicographers, and is uniformly so pronounced by the best speakers. Mr. Nares tells us, that Dr. Johnson seems to think, that, when this word is used in its literal sense, — as, in its literal sense, —as,
"In his sauster hand, instead of ball,

He placed a mighty mug of potent ale,"

Dryden,—
it has the accent on the second syllable; but when in
the figurative sense of corrupt, msidious, &c., on the first.
This distinction seems not to be founded on the best usage."

The king referred to, according to some, was Charles II.; but according to a greater number, James L. The following account is given by Dean Swift, in his "Police Conversation:"—"But pray why is it called a sirlois?—Why, you must know that our king, James I., who loved good

eating, being invited to dinner by one of his nobles, and seeing a large loin of beef at his table, he drew out his sword, and in a frolic knighted it." Whether this was related by Swift in a serious or "merry mood," may be doubted; as it may well be doubted whether this is a correct account of the origin of the word. It is not found in any English dictionary previous to that of Johnson, with the orthography of sirlois; but the earlier orthography was surlois. Bailey's Dictionary has surlois of beef, corresponding to the French surloins de bauf, the obvious or probable etymology. Surlois is also given by Alnsworth; and the word occurs repeatedly in Congrave's Dictionary, first published in 1611, with the orthography of surloins and surloins. See Sullois.

The last syllable of byed and quadruped is uniformly written ped, without a final e. With regard to the others, usage is divided, though the final syllable of most of them has been heretofore more commonly written psde, with a final e; and it is pronounced by some orthoepists long, and by others short. There is no good reason for this diversity, and the best, and, perhaps, only practicable mode of establishing uniformity, is to spell them all without a final e, and pronounce the final

of the black are themselves, against me in the pronunciation of this werd, I have ventured to prefer the regular pronunciation to the irregular. The adjective sooty has its regular sound among the correctest speakers, which has induced Mr. Sheridan to mark it so; but nothing can be more abourd than to pronounce the substantive in one manner, and the adjective, derived from it by adding y, in another. The other orthospiest, therefore, who pronounce both these words with the so like it, are more consistent than Mr. Sheridan, though, upon the whole, not so right, "Malker," not so right." Walker.

To allay; to compose; to assunge; to tranquillize; to calm; to soften; to mollify. to gratify, to pacify to mitigate; to appease. 37 "17h, at the end of words, is sharp, as death, breath, &c., except in beneath, both, with, and the verbs is seeth, to smooth, to sooth, to mouth, all which ought to be written with a final, not only to distinguish some of them from the nouns, but to show that th is soft; for th, when final, is sometimes pronounced seet, as in to smooth; yet six, at the end of words, is never pronounced hard. There is as obvious an analogy for this sound of thin these verbs, as to the cound of s in verbs ending in set, and why we should write some verbs with sould of as in tenser versa, as for the zero and of a verte ending in as; and why we should write some verbs with s, and others without it, is inconceivable. The best way to show the absurdity of our orthography, in this particular, will be to draw out the nouns and verbs as they stand in Johnson's Dictionary:

Into its a departure from our great (excognipher which he himself would approve, as nothing but madvertency could have led him into this unmeaning irregularity." Walker.

Although Walker speaks so decidedly on this matter,

Attaough water speaks so decidedly on this matter, yet he has not accommodated the orthography of all these words to the principle which he inculcates. It could be wished that all the words of this class were conformed in their orthography to this rule. The only ones which are not now actually, by respectable usage, conformed to it, are the verts to mouth and to smooth, which we hardly ever see written to mouthe and to smooth.

BOT "Mr. Sheridan is the only orthoepist who has accented this word on the first syllable, as I have done; for Dr. Johnson, Dr. Ash, Dr. Kenrick, Barclay, Fenning, Bailey, and Entick, accent the second. Its companion, desultary, is accented on the first syllable by Mr. Sheridan, Dr. Johnson, Mr. Nares, Mr. Smith, and Fenning, [and by J. F. E. Ja. K. Sm. R. Wb.] but on the second by Dr. Ash, Dr. K.nrick, Mr. Scott, W. Johnston, Mr. Perry, Buchanan, Bailey, and Entick. As these two words must necessarily be accented alike, we see Dr. Johnson and Fenning [also J. K. Sm. R. Wb.] are inconsistent. But, though the majority of authorities are against me in both these words, I greatly mistake if analogy is not clearly on my side." Walker.

discriminately to express very different senses, as discriminately to express very different senses, as may be seen in Johnson. but, as custom has adopted a different spelling and a different pronunciation, it is to be presumed it has not been without reason. That the first sense of the word, meaning fins, acute, &c., should extend itself to the latter, meaning siy, artful, &c., is not to ewondered at, as words have a tendency to fall into a bad sense; witness knavs, villans, &c., but, if custom has marked this difference of sense by a difference of spelling and pronunciation, it should seem to be an effort of nature to preserve precision in our ideas. If these observations are just, the abstracts of these words ought to be nature to preserve precision in our ideas. If these observations are just, the abstracts of these words ought to be kept as distinct as their concretes: from subtile ought to be formed subtiley, and from subtile, subtilety; the b being heard in the two first, and mute in the two last." Suc-cession, or of following in order; that which follows or succeeds, ocnsecution; a series of things or persons following one another in order; a lineage, an order of descendants; power or right of succeeding.—Apostolical succession, (Theol.) "The uninterrupted succession of priests in the church, by regular ordination, from the first commission given by Christ to the apostles, and recorded in the Gospels, down to the present day. And the doctrine of 'the spostolical succession,' as it is properly called, means the belief that the clergy, so regularly rely called, means the belief that the clergy, so regularly ordained, have a commission from God to preach the gospel, administer the sacraments, and guide the church; that through their ministration only we can derive the grace which is communicated by the sacraments. It follows, of course, that those sects of Christians which have no succession (baving seceded from Romanism without retaining ministers regularly ordained, or heving subsequently interrupted the succession, that is, all

Protestant bodies, except the church of England) have, properly speaking, nicipit the clutter of Engiand) have, properly speaking, neither church nor sacraments, since they possess no apostolical authority. The church of Engiand does not affirm this doctrine in her Articles; and the language of Art. 19, although not excluding it, is plainly not such as would have been used by framers who wished to inculcate it." This word is not unfrequently pronounced with the accent on the second syllable, as if it were formed the accent on the second syllable, as if it were formed from success; but this accentuation, though agreeable to its Latin original, has, as in confessor, yielded to the prevailing power of the English antepenultimate accent. Dr. Johnson, Mr. Sheridan, Mr. Elphinston, and Entick accent this word on the first syllable; and Dr. Ash, Dr. Kennick, W. Johnston, Mr. Perry, Buchanan, and Bailey, on the second. Barglar and Forning over his the second. Barglar and Forning over his the second. Kenrick, W. Johnston, Mr. Perry, Buchanan, and Bailey, on the second; Barclay and Fenning give both, but prefer the first; Mr. Scott gives both, and prefers the second: but, from the opinion that is foolishly gone forth, that we ought to accent words as near the beginning as possible, there is little doubt that the antepenultimate accent will prevail."
